(54) Title: METHOD AND APPARATUS FOR MARKING AN EGG WITH AN ADVERTISEMENT AND A FRESHNESS DATE

(57) Abstract: An egg is provided with an advertisement and a freshness date upon the egg. The advertisement and freshness date may be applied to the egg with radiant energy. The egg may move through an egg-handling machine through a region where the radiant energy may be applied to the egg. The radiant energy discolors the egg, thereby creating text and graphics, which form the advertisement and freshness date.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
